README FILE

INPUT format for first question
PUT="PUT /assignment1/key1/val1 HTTP/1.1\r\n\r\n"
GET= "GET /assignment1?request=key1
HTTP/1.1\r\n\r\n"
DELETE="DELETE /assignment1/key1
HTTP/1.1\r\n\r\n"
For wrong responses we get like "HTTP/1.1 404 Not
Found"

1)

Open the server and ip address of server and then
open the client and type destination ip address now we
get a connection.

2.).

Open the server and enter the ip address of server then next
open the cache and enter the ip address of server (destination ip
address) and next enter the cache ip address now in the client
enter the destination ip address(cache ip address) now request as
per above format
